### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 66—69, 71 –75 are rejected under 35 U.S.C. 102b) as being anticipated by Tanaka (6,431,318).

Tanaka teaches a food management and inventory system for a sushi train restaurant, wherein a plurality of bases 4 supporting food servings are conveyed along a closed loop conveyer 3 having a customer section S2 and a food service station S1, wherein each of the bases is electronically identifiable by bar code Q. Tanaka also teaches a computer with a control unit 9, a keyboard 90 and monitor 80, and a sensing means 5 with a laser scanner. Further, Tanaka inherently teaches the information of price of the food and a current by judgment means 7 through the monitor 80.

As for claims 87-91, Tanaka teaches all elements of the method of the claimed invention.

3. Claims 95-96 and 98 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu I (2002/0108506).

Shimizu I teaches an automated food handling system comprising means –conveyer 205 for transporting food servings along the closed loop, at least one treatment module-kitchen coupled in parallel to the transportation means, means 207 for sensing and recognizing the type of food servings being transported on the transporting means, and

means 209a for automatically diverting the food servings from the transporting means to one of the treatments modules-kitchen.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 70 and 97 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu I in view of Shimizu II (JP10201599).

Shimizu I teaches substantially the claimed invention, but does not teach altering the temperature of food servings. Shimizu II teaches an automatically managing device for sushi train having a scanner 5 with temperature sensor (Abstract). It would have been obvious to one having ordinary skill in the art to modify the invention of Shimizu I to include a temperature sensor as taught by Shimizu II in order to alter the temperature of food servings.

***Allowable Subject Matter***

6. Claims 76—86 and 92-94 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 50-65 are allowed.

***Response to Arguments***

8. Applicant's arguments with respect to claims 66-75, 87-91 and 95-98 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
